

Tycoon Cashflow And Why You Need It

Many people don't know that it's possible to make a living online, or at least a good extra income. Most think you have to go to college and have a great job to make a lot of money these days. Well if you think that way, I'm about to really surprise you, and show you exactly how you can make a lot of money online starting now!

Don't worry it's not a scam, pyramid scheme, or any of that fluff. I know, when I first heard about making money online that was the first thing that came to my head too. But when I started collecting checks every month, my whole theory changed!

So enough of all that, I'm actually going to show you how to start making money online now! What I want you to do first is go to a website called ClickBank and sign up (it's free). What they do is manage a bunch of different products that you can promote for a commission. All you need to do is send traffic (people) to that product page, and if they buy, you make your commission. The correct term for it is, becoming an affiliate. Here's a quick example to clear your up your confusion. Lets say one of the products is selling for \$100 and you get a 50% commission. Every time you make a sale, you'll obviously make \$50. So if you get 10 people to buy it, you'll get a check for \$500! See what I mean, it's possible to do and extremely easy!

Once you've signed up in ClickBank, the next important thing to know is obviously picking a good product to promote. Now this is where a bunch of affiliates fail to be successful online. But right now I'm going to tell you a quick tip that helped me become extremely successful, very quickly. Under each product in the "Marketplace" of ClickBank, there's something called "gravity", what it means is Gravity. What that tells you is if the product is selling well. You always want to pick a product that is over 50 gravity. If the product isn't over that, don't go for it! Once you know that, you'll be able to successfully sell products on ClickBank. The reason you want the Gravity to be high is because that tells you that other affiliates are successfully selling it. Let me tell you a quick secret that most people don't know about Gravity. The number of Gravity actually means how many affiliates that product has! For example, if the gravity is 75, that means 75 different affiliates are selling the product at that time… Easy enough right?

So now that you have that down, go make some money online! It's seriously not as hard as most people think, especially when you have the right people teaching you. That's how I became successful online, just happened to be around the right teachers at the right time!

If you want to find out more about how you can become successful online through affiliate marketing, and also find out WHERE to promote, check out my free 7-day Bootcamp! I actually explain to you in detail how I did it, and how you can "actually" use the exact steps I did. It's worth it, and it's free, how could you say no!

I think one of the least talked about ways of making money online has to be promoting on the street. The reason is because as soon as the Internet became popular it was literally kicked to the curb! Originally, everyone was making money on the streets, either by handing out flyers, or placing lawn signs everywhere. If I were to tell you that you could still make money by doing this, you'd probably call me nuts! Well, if you really want to think that, go ahead because I think this needs to be talked about.

If you want to make a lot of money extremely quickly, do this, I promise it works! What I want you to do first is go to a website called ClickBank and sign up (it's free). What they do is manage a bunch of different products that you can promote for a commission. All you need to do is send traffic (people) to that product page, and if they buy, you make your commission. The correct term for it is, becoming an affiliate. Now the good part…

Once you've done that, the promoting on the streets comes into place. After you pick a product that you want to promote on ClickBank, I want you to open up Microsoft Word, Notepad, whatever you use on the computer to write things. You will need to write 2 sentences about the product you are promoting, and make it catchy! Make the font extremely big and bold so that people can read it from far away. Then place your custom link to the product you are promoting at the bottom of it. (It's called your "Hoplink" and ClickBank creates it for you, it's extremely easy.) Now after you have done that, I want you to print out about 100 of these. Fold them in half and take them with you on a walk around your neighbor hood. When you're walking, place them on the windshields of parked cars… After you've run out, go home and log into you ClickBank account later that night. I guarantee you'll be surprised!

This is exactly how I started affiliate marketing. I know you're probably thinking that this would never work and that it's a waste of time. Well let me tell you something. When I used to do this, for every 100 I would hand out, I'd get around 10 people buying. So lets say that I received \$50 a sale. I would make \$500 dollars every time I'd go out and do this! Sounds a little more appealing now, right?

So go out and do this, I promise you if you just try it, you'll start seeing great results immediately. If you want more tips like this about affiliate marketing, I highly suggest you join my free 7-day Bootcamp where I explain exactly how

to make money with affiliate marketing, from scratch! And it's free, what's better than that?

Most people don't realize how much money there is in blogging. The first time I saw people blogging; I thought they were completely nuts! But that's until I figured out they were making thousands of dollars per month. I then figured out I was the nuts one!

So now that I know exactly how to make money blogging, and have done it myself, I'm going to explain to you exactly how they are doing it and how you can get started too! It's also extremely easy! Let's just say it takes about an hour a day and you're good to go making a lot of money online. But that's only if you know the secret that I'm about to reveal to you!

Most of the people out there blogging are missing out on thousands of dollars since they don't know the simple secrets! If you are one of them, or if any of them are reading this now, I guarantee you/they will smack their head on a wall multiple times for not realizing this earlier.

The BIG secret to blogging is, becoming an affiliate to products related to the blog you own, that's it! Now let me explain to you exactly what I mean by this! Let's say you have a blog about training dogs. Now you can place ads on the blog, which is what most of the people out there do. Yeah, you can make a good amount of money if you have MILLIONS of people reading your blog, but chances are, you will never have that. Sorry to burst your bubble. But let's say you do have 30k people a month reading your blog. If you become an affiliate of a dog-training product and write a short 300-word article on it to your viewers, I guarantee that you'll make a lot more than ads will make you. The reason for this is because you can earn up to 75% promoting people's products. So if the product sells for \$100, you'd make \$75 per sale! Out of 30k viewers, you'd probably get around a 2% conversion rate since they all want dog training information, meaning you have targeted readers. That's around \$45,000 dollars you're missing out on! Now just do this once a month and I think you'll be happy with that right?

But hey! You don't have to take the ads off your blog, leave them on for some extra money. But if you're not doing what I just told you to do already, go out and do that right now, if you don't, I don't know what to tell you.
